

Boeing Concept Exploration Information Session

You're invited to two information sessions. Refreshments will be provided!

- Looking for Fun and Challenging Work?
- Want to learn about Helicopters?
- Interested in Unmanned Aircraft?

Monday, October 20th:
11:30 – 1:00 pm in 33-116
6:30 – 8:00 pm in 33-206

Concept Exploration develops advanced, high-performance unmanned aircraft. Formerly Frontier Systems, the current focus is on the A160 Hummingbird, an advanced, unmanned helicopter whose patented rotor technology and innovative subsystems offer dramatically improved performance over conventional helicopters. A small, closely-knit team of engineers, manufacturing specialists, and administrators work in state-of-the-art facilities in beautiful Southern California. Come to learn about unmanned helicopters and a future job!
