COMMUNITY LAB

Paid Teaching and Laboratory Summer Internship

The Biogen Idec Community Lab is a state-of-the-art real-world facility where students engage in hands-on biotechnology experiments and interact with scientists. The goal is to excite, transform, and empower students to become the discoverers of tomorrow. The Community Lab offers local schools and students educational opportunities in science and biotechnology.

In addition to programs during the academic year for the Cambridge and Somerville Public Schools the Community Lab will be offering several summer programs for high school students. The Community Lab is looking for an intern to assist with the summer programs.

Responsibilities would include:

- **Provide lab and teaching assistance during the summer sessions for high school students**
- **Assist with organizing summer sessions and related paperwork**
- **Basic laboratory preparation and clean up**
- **Opportunity to help develop hands-on lab activities and accompanying curriculum**
- **Opportunity to interact with biotech professionals and see what goes on a biotech company**

The ideal candidate would have a strong background in biology, preferably cell and molecular biology or biochemistry and some previous teaching experience or strong interest in teaching or working with high school students.

The internship starts in late May/ early June and ends in late August/ early September.

Accepting resumes now.
