

Position available

Expression of the Green Fluorescent Protein (GFP, green) and *Drosophila* Notch (red) in the larval imaginal disc.

A **Laboratory Technician** position is available in the Veraksa lab at the University of Massachusetts Boston, **starting July 2006**. We study the composition and dynamics of protein complexes involved in the regulation of signal transduction pathways during *Drosophila* development. Position is for **full-time** employment and includes a **benefits** package. Initial appointment is for **one year**, with a possibility of an extension. Experience, training or education in molecular biology laboratory techniques required. Experience with *Drosophila* maintenance highly desired. If you are interested in this position or know someone who may be interested, please send inquiries to Alexey Veraksa (e-mail: alexey.veraksa@umb.edu, phone: 617-287-6665).
