International Biometric Group

R e s e a r c h • C o n s u l t i n g • I n t e g r a t i o n

Software Developer:

As a software developer at IBG, you will build biometric systems that may be deployed in national defense, airport security, and counter-terrorism applications. You will gain experience with cutting edge biometric technologies as part of testing efforts and system integration projects. At IBG you will have the opportunity to interact directly with clients to assess their needs and develop customized solutions.

Consultant:

As a consultant at IBG you will be engaged by Fortune 100 companies and government agencies that are considering deploying biometrics to provide needs assessment, requirements gathering, feasibility analysis, and business case development services. You will interact with high level managers inside and outside the biometric industry while working daily with IBG managers to hone your consulting skill set.

Research Associate:

IBG Research Associates execute scenario-based tests of biometric technologies and produce groundbreaking research papers, reports, and presentations on biometrics and other emerging identification technologies for Fortune 100 companies and government agencies.

The IBG advantage

International Biometric Group (IBG) is the biometric industry's leading research, consulting and technology services firm. Our list of clients includes World Bank, Microsoft JPMorgan Chase, and various US government agencies. Positioned at the heart of a rapidly growing high-tech industry, IBG provides ambitious, bright, self-motivated individuals the opportunity to quickly advance to greater responsibilities typically reserved for more senior personnel at other firms.
