MATH / SCIENCE / ENGINEERING – the children of Boston need you!

We are currently recruiting smart, talented, diverse candidates with strong Math/Science backgrounds to enter a rigorous, one-year urban teacher preparation program as part of Boston's aggressive strategy to improve instruction in every classroom. We are the #1 recruiting strategy for the Boston Public Schools and recruit for K-12 teaching positions, with a strong focus on filling critical needs areas of **MATH**, **SCIENCE**, special education, and English language learners. Receive a **\$11K stipend** during the year while you work with a Mentor teacher in a classroom and complete coursework. BTR graduates earn a **M.Ed.**, a MA teaching **license**, dual license in special education, and a **BPS teaching position** – all at **no cost** if you teach for 3 years in the BPS. BTR is an innovative, affordable, and successful route to teaching, designed to meet the challenges of urban education and the needs of our children. Be a part of real change: **Teach for Boston**. Email btr@bpe.org for more information, or visit www.bpe.org/btr
