

2009 EAPS Lecture Series Climate Effects on Human Evolution and Human Impacts on Climate Change

54-915 Noon - 1pm

During 2009, notable events will include the 200th anniversary of Charles Darwin's birth and the 150th anniversary of the publication of *The Origin of the Species*. EAPS will present a series of topics that will place human evolution in environmental and ecological contexts and will examine the feedbacks between climate and human evolution.

Friday, Jan. 9

Paleoenvironmental Context of Early Human Evolution: Timing and Causes of African Climate Change; Peter DeMenocal, Lamont Doherty Earth Observatory

see IAP website for complete lecture schedule
