Multidisciplinary

studies in

CANCER BIOLOGY

OUR MISSION

- To offer a program leading to a PhD in Cancer Biology
- To provide participation in cutting-edge cancer research, spanning cell biology, biophysics, organic synthesis to radiation oncology, stem cell research, nanotechnology and clinical trials
- To educate the next generation of Cancer Biologists who will act as mentors and high profile researchers
- To provide translational research opportunities
- To provide a training program that is supported by a prestigious National Cancer Institute training grant award

OUR PROGRAM

- Multidisciplinary, cancer-focused training program with over 40 faculty from 12 departments
- Full Tuition and Stipend guaranteed
- Laptops provided to all students
- Possibility for bonus stipend for outstanding students
- Affiliation with an NCI-supported Comprehensive Cancer Center and direct access to the clinic
