

Positions available in a new cell-adhesion & cytoskeleton lab in Singapore

Postdoc, graduate student, and technician positions available in the lab of Dr. Ronen Zaidel-Bar (<http://CellAdhesionLab.com>) to study the regulation of cell-cell adhesion and cytoskeletal dynamics in tissue culture and in the model organism *C. elegans*.

The lab is part of the new Research Center of Excellence in Mechanobiology in the National University of Singapore (<http://www.dbs.nus.edu.sg/mechano>), which is setup to be the world's leading center for interdisciplinary research in tissue, cellular and molecular mechanics. Singapore is a world-class city offering a high standard of living within an exciting blend of cultures, cuisine and arts.

Highly-motivated candidates with a strong background in cell or developmental biology, biophysics or biology-related engineering should send a CV, a description of research interests, and names of three references to Dr. Zaidel-Bar (zaidelbar.lab@gmail.com). Successful applicants will be offered a competitive salary package, and a housing allowance.
