Environmental Internships in Oregon

Ecoinformatics Summer Institute **OSU** Oregon State University

WHO: Undergraduates from all over the U.S.

WHAT: Challenging and rewarding summer research experience with stipend, housing, and travel money provided.

WHEN: June 17th-August 24th, 2012.

Application deadline Feb. 17th, 2012.

WHERE: HJ Andrews Experimental Forest on the McKenzie River and at OSU in Corvallis.

HOW: Please visit website for more information and details on how to apply:

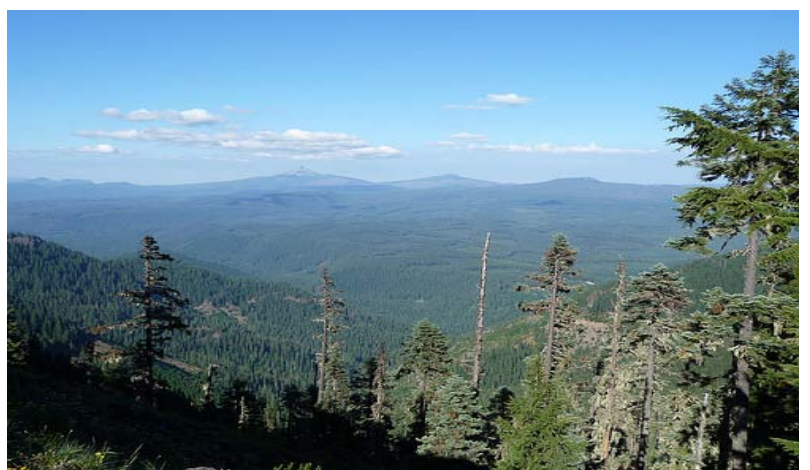

<http://eco-informatics.engr.oregonstate.edu/>

Contemporary careers demand capabilities to integrate technology, theory, and practical knowledge. Develop skills in collaboration and gain hands-on experience in the beautiful old-growth forests and stream ecosystems of the mountains of Oregon. Work in teams to explore challenging natural resource management problems, extensive databases and complex ecosystem models, and new technologies for measuring ecosystems. Interact with other talented students to explore botany, climate science, computer science, ecology, engineering, fisheries, forestry, mathematics, statistics, water resources, zoology, and many others.

"EISI provides an excellent opportunity to add to the legacy of the HJ Andrews Experimental Forest with innovative ecoinformatics research. Living and working at the Andrews provides a spring board right into the heart of the Oregon Cascades."

--EISI, 2008 Participant

**Come discover Oregon and be part
of the emerging science of ecoinformatics!**
