

MIT Genentech Campus Ambassadors Present:

FALL INFORMATIONAL SESSION: Intern/Co-op Program

Join us to learn more about the great job opportunities Genentech has to offer.

Founded in 1976 by Robert A. Swanson (MIT '70) and Dr. Herbert W. Boyer, Genentech was the initiation of an entirely new industry in which recombinant DNA technology was the key to solving some of the world's greatest unmet medical needs. Ever since its inception, Genentech has been a leader in the biotechnology industry, with a strong emphasis on science in the pursuit of patient care.

Along with blockbuster drug approvals such as Herceptin® and Avastin®, Genentech sits at the forefront of medical research and historically publishes a number of high-impact papers. And unlike many other companies, Genentech is driven by exciting basic research in a collaborative, casual atmosphere on four different sites along the West Coast, with its research headquarters based in South San Francisco.

**Monday, October 29
Bush Room (10-105)
7:00-8:00pm**

Join us in a presentation about Genentech and the various opportunities for internships, rotational programs, and full-time positions. Additionally, a panel consisting of three past interns will be held to provide a more intimate look at what Genentech has to offer.

Dana Gharda, Sr. Program Manager, College Programs, will be in attendance.

Dinner will be provided.

Join us on Monday, October 29 in the Bush Room from 7-8pm
