

# INTREXON<sup>®</sup>

The engineering of biology is creating remarkable, revolutionary solutions to the world's most pressing challenges in the health, food, energy, consumer, and environment sectors

At Intrexon, we are enabling products and empowering people to realize a better, cleaner, healthier planet

We seek smart, driven and inspired future colleagues to join us. We have summer intern opportunities in corporate development (acquisitions), operations, strategic planning and R&D (cell and molecular engineering, therapeutics, agricultural biology, microbial strain engineering, bioinformatics)

Learn more! We're presenting on [Wednesday, October 28<sup>th</sup> at 7 PM](#)
