

Roivant Sciences: Reinventing Drugs

Roivant Sciences is a unique biopharmaceutical company dedicated to realizing the full value of promising drug candidates by advancing them through clinical development and regulatory approval. Roivant was founded on the insight that, due to a number of inefficiencies in pharmaceutical research & development, clinical development of many drug candidates is halted or delayed despite the molecules' scientific merit and clinical potential. Roivant's business model is to identify and acquire these drugs and accelerate them to patients. With initial funding from leading institutional investors and development expertise from the world's top drug developers, Roivant is actively pursuing its core mission: reinventing drugs.

Why Work at Roivant?

- Roivant is extremely well-funded

We have raised in excess of \$500M to support clinical development programs for our drug candidates

- Roivant attracts elite talent to lead its clinical development programs

Our development leadership is responsible for the clinical advancement and approvals of Aricept (the top-selling drug for Alzheimer's disease) and Sovaldi (the largest commercial drug launch of all time)

- Roivant offers a flat and entrepreneurial organizational structure

Junior-level employees enjoy unparalleled access to senior management and work alongside executives to make critical investment and development decisions

- Roivant provides opportunities for advancement unmatched in tech or finance

Pure meritocracy rewards contributions to the firm, not organizational hierarchy

Roivant's Hiring Philosophy

At Roivant, we prioritize intellect above specific experiences. As MIT grads ourselves, we appreciate that the brightest people don't necessarily have 'standard' life-science backgrounds. Our hiring strategy is to identify top talent from all backgrounds and craft roles that best align with their abilities. We are looking for extraordinary minds to assist in the evaluation, acquisition, and development of target pharmaceutical programs. Depending upon your background and the company's needs, your role at Roivant could involve scientific diligence and evaluation, clinical development, business operations, corporate strategy, or a combination of all the above. We are willing to consider all majors and backgrounds from exceptional candidates.

Qualifications

Required:

- Undergraduate MIT degree with outstanding academic record

Preferred (not required):

- 1-5 years of experience at a top-tier consulting firm, investment bank, venture capital fund, or company in any industry (e.g., tech) known for its ability to recruit and develop top talent
- Graduate degree from a top university, with outstanding academic record
- Courses 6, 7, 8, 10, 14, 15, 16, 18, and 20 are particularly encouraged to apply, but all applications are welcome
