

Who We Are

At the Roche Group, about 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. A member of the Roche Group, Genentech has been at the forefront of the biotechnology industry for more than 30 years, using human genetic information to develop novel medicines for serious and life-threatening diseases. The headquarters for Roche pharmaceutical operations in the United States, Genentech has multiple therapies on the market for cancer and other serious illnesses. Please take this opportunity to learn about Genentech, where we believe that our employees are our most important asset and are dedicated to remaining a great place to work.

Discovery Oncology department at Genentech:

Our mission is to:

- Conduct focused and comprehensive research projects to validate prospective targets and to identify therapeutics with an emphasis on metabolic disease, oncology and on diseases with clear unmet need despite a well-defined genetic or other basis.
- Provide cutting edge technologies for engineering the germ-line of the mouse and other model organisms to support the development of novel animal models for the exploration of disease mechanisms and the generation of drug candidates.
- Expedite research by providing access to reagents and technologies for characterization of genomes and for genome engineering and screening. Employ these tools to identify disease mechanisms and targets for therapeutic intervention and to validate data from both animal models and clinical material.

The position

Intern responsibilities will include:

1. Mammalian cell culture and genetic manipulation
2. Carry out chromatin biology assays to validate drug targets in the epigenetic space
3. Develop assays to evaluate resistance mechanisms to anti-cancer agents.

Who You Are

1. Undergraduate or graduate student with laboratory experience.
2. Have cell culture experience.
3. Have an interest in oncology drug discovery.

Genentech is an equal opportunity employer & prohibits unlawful discrimination based on race, color, religion, gender, sexual orientation, gender identity/expression, national origin/ancestry, age, disability, marital & veteran status.
