ANNOUNCING A NEW UNDERGRADUATE MAJOR IN

MATHEMATICAL ECONOMICS (14-2)

Why course 14-2?

- Complete undergraduate preparation for Ph.D. study in Economics — plus extra math!

- The major includes the most important introductory courses in Economics, but focuses the remainder of the program on more technical and mathematical studies in both the Economics and Math Departments.

- Provides a more solid mathematical foundation while concentrating in a subset of the economics subjects, typically the more technical and micro-oriented subjects.

Have questions?
Come meet the faculty!

-> 9/6 @11am in Lobby 10 **(Booth 4)**

Profs. Anna Mikusheva and David Autor

-> 9/7 @11am in Lobby 10 **(Booth 2)**

Profs. Anna Mikusheva and Jon Gruber
