

HST.S55: Emerging Problems in Infectious Diseases

Offered IAP 2017

1-0-2 Units (P/D/F). Graduate

Lecture and Labs: Mondays & Wednesdays, 1:00-2:30pm, Room E25-101

Course Director: James J. Collins, PhD

Emerging infectious diseases represent one of the greatest threats to human health and global stability.

This January short course:

- introduces contemporary challenges in preventing, detecting, diagnosing and treating emerging and newly emerging pathogens.
- provides students with team-based opportunities to develop and present innovative solutions to such challenges.
