Looking for a STEM Mentor?

Join our **NEXT Scholars Program**

➔ Go to www.nyas.org/NEXT

The NEXT Scholars Program of the New York Academy of Sciences pairs **first and second year undergraduate women** with **female mentors in STEM fields** to work together over the course of one year through **online** meetings and lesson modules. Your mentor will expose you to a variety of STEM fields and help you develop the skills you need to succeed.

How the NEXT Scholars Program works:

- You'll be paired with a female STEM professional, and meet online for **one-on-one mentorship, twice a month, for a one-year time period.**
- Through the **NEXT Scholars Network** of mentors and mentees, you'll be exposed to a multitude of careers in STEM-related fields.
- **Online lesson modules** will develop your soft skills, including: critical thinking, leadership and communicating effectively — essential to your success in the workforce.

The Next Scholars Program was formed through a public-private partnership between the U.S. Department of State and New York Academy of Sciences. The 2017-2018 Program is made possible by a grant from the Infosys Foundation USA in pursuit of its mission to bridge the digital divide and empower underrepresented students and educators to become creators of technology.

Program Dates:

FEB-DEC
