

# ENROLLMENT OPEN

## Imaging Biophysics and Clinical Applications

**HST.563**

An introduction to the biophysical principles behind various **imaging modalities**, current and near-future **clinical applications**, and the current practical and economic landscapes in which research is conducted. Emphasis will be placed on clinical applications of **imaging research**. Get hands-on experience with various imaging modalities during four exciting laboratory sessions to fully appreciate the clinical applications of imaging biophysics.

**Spring 2019 @ MIT**  
Lectures in Room 4-261  
Tuesdays & Thursdays, 9-10 AM

**DON'T MISS THIS OPPORTUNITY**  
**Enrollment is still open!**

Please contact the course directors with questions.

Course Directors: **Ciprian Catana** (ccatana@mgh.harvard.edu)  
**Robert Barry** (robert.barry@mgh.harvard.edu)
