

One in two people will be diagnosed with cancer during their lifetime. BioTarget is the world's first biotech competition for emerging companies dedicated to finding new molecules for cancer treatment.

The competition invites applications from early ventures seeking to characterise further or validate their drug targets using cellular and molecular assays.

Following the online application, the top 10 applicants will be invited to attend the pitch event in London, where they will present their projects in front of an expert panel and a diverse audience consisting of life science investors, industry professionals, academics, and fellow entrepreneurs.

Timeline:

March 29th **Application deadline**

April 15th **Announcements**

Late May **Pitch event in London**

WHY APPLY

Win free experimentation worth up to \$100,000 conducted in Arctaris' cloud lab equal to one year of lab work.

In addition to free experimentation, the three winners will benefit from the BioTarget partners' business support. This means free IP training, hands-on business mentoring from experienced entrepreneurs and executives, and access to a leading network of bio-entrepreneurs and investors.

THE AWARDS

Prize

1st prize:

free experiments worth \$100k

2nd prize:

free experiments worth \$50k

3rd prize:

free experiments worth \$20k

Publicity

Get your company promoted to an exclusive audience through all Science Entrepreneur Club channels (article, interview and more).
