

The three laws of communication

Jean-luc Doumont

Tuesday

January 21

1:00 - 3:00 pm

Room 10-250

This talk proposes and illustrates three simple yet solid ideas that lead to more effective communication: easy to remember, readily applicable, and always relevant.

An engineer (Louvain) and PhD in applied physics (Stanford), Jean-luc is acclaimed worldwide for his highly applicable recommendations on a wide range of topics. He is the author of “Trees, maps, and theorems.”

Open to MIT students, postdocs and alumni.
