**Research Associate – Immunology and Cell Biology
Brigham and Women's Hospital
Taking applications now to start after March 2020**

The Moody laboratory at Brigham and Women's Hospital seeks a full time **Research Assistant** with interest in immunology, cell biology or bioinformatics. Successful applicants will join a collaborative, discovery-focused team, where they will work in a modern, well-equipped scientific laboratory. We seek better understanding of human immune responses to *Mycobacterium tuberculosis* with a long-term goal of improving vaccines and diagnostic tests.

We are seeking highly motivated applicants with a Bachelor's Degree or Master's Degree granted prior to the start date. Experience in tissue culture is preferred, but all applicants with documented laboratory experience will be considered. The **Research Assistant** will receive training in flow cytometry, tissue culture, transcriptomics, and bioinformatics.

Please contact Ildiko Van Rhijn at I.vanRhijn@uu.nl for more information and to apply. Applications should include a brief statement of interest, current CV and list of references.
