

# Living in the time of global pandemic: CEE research on disease transmission and spread

Join the CEE faculty as they share insights from COVID-19 related research to better understand how diseases interact with the environment around them and about the work being done to mitigate future outbreaks.

**Sustainability starts with CEE.**

Starting on April 1, 2020: This is a six-week, 3-unit special subject, open to all undergraduate and graduate students that will meet Wednesdays from noon-1 pm. **Add this subject to your Spring registration:** <https://studentformsandpetitions.mit.edu/>
