

Healthy men and women 18-30 years old wanted for a research study

Researchers at Boston Children's Hospital are seeking healthy men and women for a research study to learn more about how sex chromosomes and sex hormones cause differences in health and disease between men and women. Study participation involves a questionnaire and a single visit to Boston Children's Hospital on a weekday for a blood draw and urine sample. Participants will be compensated with a \$25 gift card and parking will be reimbursed with a \$10 parking voucher.

You may be eligible to take part in this research study if you:

- are between 18 and 30 years old
- are not taking any prescription medications
- do not have any chronic medical conditions
- live in the Boston area
- for women: are not pregnant and are not at risk of getting pregnant; have regular periods
