Boston Children's Hospital

ATTENTION COLLEGE GRADUATES - RESEARCH ASSISTANT POSITION

Are you interested in first class research training while planning for graduate or medical school?

Join the laboratory of Stephen C. Harrison at Harvard Medical School and Boston Children's Hospital

We seek a highly skilled and self-motivated individual with experience in molecular biology, biochemistry or other closely related field to join our research group. The project is part of a multi-laboratory collaboration concerning new directions in influenza vaccine design. The research is at the interface of virology, immunology and structural biology. Applicants should have the communication skills and motivation to work in a highly collaborative environment.

Experience with cell culture is desirable.
A two year commitment is expected
