

# An Insider's View of the Apocalypse: Lessons from failures of leadership and teamwork

A conversation with Dr. Steve Projan '74, consultant and scientific advisor to the biopharmaceutical industry primarily focusing in infectious disease research. Dr. Projan was the Head of Infectious Diseases & Vaccines Innovative Medicines unit (iMED) at MedImmune, leading a cross-functional team dedicated to the therapeutic area strategy, prioritization and advancement of the company's infectious disease and vaccine portfolio.
