

ENN Group

China Invites You

新奥集团副总裁,首席技术官 甘中学博士 Zhongxue Gan, Ph.D.

Vice President and Chief Technology Officer of ENN Group

与您讨论归国发展的经验及体会

Founded in 1989, ENN Group has grown into one of the largest renewable energy companies in China. As one of the most competitive and innovative private energy enterprises, ENN is committed to the production and application of clean energy. The Group has taken on clean energy innovation as its mission, established CO₂ recycling business as its core strategy, and regards the clean production of coal-based energy as a major breakthrough. At present, ENN has completed a clean energy value chain from energy production, conversion, storage & transportation, and distribution & application. Our business ranges from coal-based clean energy, solar energy to biomass-based energy. By the end of 2008, ENN has set up more than 100 subsidiaries in over 80 cities across China and overseas, and has more than 24,000 employee with total assets of USD 4 billion.
