SECURE OUR
ENERGY FUTURE

A TRANSITIONAL SOLUTION FOR THE CLIMATE & ENERGY CHALLENGE

Please join the British Consulate-General Boston for a lunch time panel discussion launching *Secure Our Energy Future: CCS*, a report exploring the role of Carbon Capture and Storage (CCS) technology in a clean energy economy.

The panel will open with remarks from Deputy Consul-General, **Chris Henderson** on the UK energy landscape.

Featured Panelists Include:

Moderator **Tony Meggs**

MIT Energy Initiative

Howard Herzog

Senior Research Engineer in the MIT
Energy Initiative

Dan Goldman

Executive Vice President & Chief
Financial Officer, GreatPoint Energy

Sarah Forbes

Senior Associate, World Resources
Institute (WRI) and CCS expert

13 September 2010

12:00 - 2:30 pm

Cambridge Innovation Center
One Broadway, 5th floor
Cambridge MA 02142

Energy is essential to our way of life and imperative for economic prosperity and national security. However, energy security is threatened by overdependence on foreign oil, in addition to the impacts of climate change. Large-scale, clean energy solutions must be deployed to meet increasing energy demand and reduce pollution. Carbon capture and storage, a transitional solution for the climate and energy challenge, is the key to a secure energy future

Please RSVP by 10 September to
bridget.gildea@fco.gov.uk

Bag lunch will be provided
