Description

The mobile smart phone market is exploding. A projected 614 million smartphones will be shipped this year, and over a billion shipped a few years from now!

77SPARX Studio was founded in 2011 by entrepreneurs and parents who saw the need for great educational apps for kids in the exploding iOS and Android markets. We have built award-winning games that are not only popular with kids and parents alike, but also teach kids important core skills. We drive towards a vision of the future where smart mobile devices are an integral part of every child's life, and we are creating quality kid's products that will be ubiquitous on these devices.

Our award-winning games are well loved by both children and parents for its quality and game play. Check out Puzzingo on the iPhone App Store and see for yourself!

We are looking for a mobile game programmer who has a passion for making great educational games for kids. The person needs to have a great attitude, a drive to be at the cutting edge of new markets and technologies, and love of mobile gaming.

This is a great opportunity for you to get in on the ground floor of mobile gaming – an industry that's expected to explode in the coming years. Besides, wouldn't it be amazing to tell your friends – "yes, I build the app that kid is playing!" There is really nothing more gratifying than the smile on kids' faces.

Skills/Software Qualifications

If you are someone who likes kid's games, or if you are someone who is excited to create something that kids all around the world will wake up in the morning and ask for, then this is for you!

- Creativity, versatility, and passion for kid's media and gaming
- Some one who enjoys a fast-paced entrepreneurial environment
- Great understanding of core software design principals and concepts
- Experience with gaming and media technology such as Flash Action Script, Lua Scripting, Corona SDK, Cocos2D, or similar technologies a big plus
- Experiences building games or apps for mobile are another plus, though not

required

Application
