

From Lab to Impact: Broadening Participation Summit - Northeast

April 24 + 25, 2023

Hosted at MIT in Cambridge, MA

Are you a university researcher (Faculty, Graduate Students, Postdocs and research staff) and a member of a group historically underrepresented in STEM (Women and/or BIPOC)?

Would you like to learn how you can:

- Help get your discoveries and inventions from the lab to the market
- Expand your research and career opportunities
- Engage with the innovation ecosystem

The summit is sponsored by the National Science Foundation I-Corps program. You will learn about a proven process that can help you drive impactful research translations. Hear directly from peer researchers that have benefited from I-Corps who will share their experiences and insights.

Key Benefits for Faculty

- Formulate new research questions and identify new funding opportunities
- Gather hands-on data validating technology applications
- Learn the language of innovation while validating technology concepts and exploring market potential

Additional Benefits for Graduate Students, Postdocs and Research Staff:

- Understand the big picture and where your efforts will have the most impact
- Increase confidence in communicating with industry / enhance career options
- Expand personal network with other researchers and connection to regional translation support resources

What to expect during the Summit:

- Meet and mingle with researchers from across the Northeastern US
- Hear from faculty, postdocs and graduate students sharing their I-Corps experiences and how it has impacted them
- Interactive program to begin exploring the potential impact of your research
- Connect with institutional and regional innovation resources
- Optional MIT lab tours – limited availability - TBD on afternoon of April 24
