

The final cut is the deepest.

*Creative educators are now empowered with the same tools as professional editors. **Deep Cuts.** A free seminar from Apple.*

Go deep.

With all the new advancements in Final Cut Studio 3, Logic Studio 2 and Final Cut Server, there are even more reasons why they are the tools of choice among professional editors. And that's great news for creative educators. Powerful new features and time-saving improvements help you work faster and with more efficiency. A tighter integration among applications offer you powerful new ways to collaborate. And with literally hundreds of new innovations, you'll have more creative options and technical control than ever before.

Deep Cuts is a fast-moving, half-day event designed to be informative, engaging and interactive — and promises to bring your digital output to the next level of brilliance. The leading post-production suites just got better — don't miss out!

Don't blink.

Apple Education experts in digital media will provide a detailed overview of Final Cut Studio 3, Final Cut Server 1.5 and Logic Pro Studio 2. We'll then demonstrate (no slides!) Final Cut Pro 7, Soundtrack 4, Motion 6 and Compressor 3.5, and leave plenty of time for Q&A. We'll also cover a Final Cut Pro editor's workflow using Final Cut Server, illustrating the product's ease-of-use, technical power and range.

We'll also introduce Mac OS X Snow Leopard, the world's most advanced Operating System. Snow Leopard utilizes barrier-shattering 64-bit computing technology that will drive your pro applications to the next level. Snow Leopard also brings us Grand Central Dispatch, empowering software developers to leverage the multiple processor cores and deliver more speed and performance to the apps used by creative professional.

Join us. It's FREE.

All events begin promptly at 9 am and conclude at 1 pm.

Tuesday, October 20, 2009

Apple Boston
111 Huntington Avenue, Fifth Floor, Boston, MA
