

Neurosilicon, a novel life science technology company, is looking for bright individuals with neuroscience lab experience (PhD level) who are eager for an exciting sales and business experience with a dynamic start-up company.

Neurosilicon's flagship product is the Photoconductive Stimulation Device (PSD). This device enables researchers to depolarize excitable cells in a non-invasive and highly targeted manner. Your challenge will be to apply your exceptional communication skills to approach prospective customers, convey the value of the product as well as address customer questions regarding its capabilities using your research background and experience, and ultimately close new sales.

This opportunity is part-time and pays commission only, allowing for greater flexibility with a high success driven earning potential. If you are interested in exploring entrepreneurial life science related opportunities while supplementing your present income, Neurosilicon may be able to provide that opportunity (must be eligible to work in the US).

As a member of the Neurosilicon team, you will be trained and supplied with all the necessary information and tools you will need to be successful. Again, income is success-based and has the potential to be lucrative. Furthermore, the opportunity to participate in this exciting life science focused company is a great way to extend your experience and skill set beyond the bench while employing your core scientific knowledge base and experience.

If you are interested in learning more about this position, please send a current resume and cover letter outlining your educational background and experience specifically with regard to how it relates to this particular position to Dr. Steven Munevar, Business Development, and Operations at: [steven@neurosilicon.com](mailto:steven@neurosilicon.com). Please reference *Sales Associate Position* in the subject line.
