

CENTER FOR ADVANCEMENT OF SCIENCE IN SPACE

Information session with
Duane Ratliff, Chief Operating Officer, CASIS

Tuesday 12 February, 4:00pm
In the MIT Hewlett Reading Room, G882, Stata Center

Duane wishes to reach postdoctoral researchers at MIT for bringing new research projects in the microgravity environment.

The main areas are: Materials, crystallography (both protein and regular), ossification and bone, sensors and observation, and anything else that is interesting and relevant.

CASIS also holds a 100K competition for researchers. If your project is selected, you get a flight to the ISS.

This event is organized by the MIT Postdoctoral Association and the MIT Industrial Liaison Program
