Dr Éric Poirier
Dr Guy Poirier
Dr Frédéric Pouliot
Dre Louise Provencher
Dre Josée Savard
Dr Carl Séguin
Dr Éric Vigneault
Dr Bernard Têtu

Salary support and start-up funds are available for faculty positions jointly held at the CHU de Québec Research Center-Oncology Axis and Laval University Cancer Research Center, starting in the first half of 2016. Research program should tackle important questions on the molecular and cellular mechanisms of cell determination/response to signals, expression of the genome or the molecular/cellular aspects of development. Successful candidates will be appointed at the level of assistant professor in the department of Molecular Biology, Medical Biochemistry and Pathology, School of Medicine, Laval University.

The applicants should have made important contributions to their field. Canada Research Chairs are available for high profile candidates. The basic research sector of the institute currently holds 25 research groups and provides a modern, dynamic and multidisciplinary environment. Most of the activities are located in the St-Patrick building in the heart of the old fortified city. Further information on research programs and services is accessible at the research center web sites (www.crchudequebec.ulaval.ca/recherche/axes/oncologie; www.crc.ulaval.ca).

Applications including a summary of proposed research program (2-5 pages), a curriculum vitae and the names and addresses of two referees should be sent (preferably by e-mail) before December 15th 2014 to:
