## Summary

Even after unprecedented recent killings, tortures, rapes, beatings, and illegal prosecutions and imprisonments of peaceful demonstrators, Iranian people have continued using every possible opportunity for voicing their desire for democracy and human rights in Iran and condemning the criminal acts of Khamenei-Ahmadinejad regime louder and clearer than ever. For example, despite the threats expressed by Khamenei, Larijani (Head of Judiciary), and Sepah officials, people filled the streets of major Iranian cities on Ghods Day (Palestine Day, Sep. 18) to express their disgusts with the regime and its policies. On Sep. 23-24, the largest assembly of Iranian opposition groups from all over the political spectrum gathered side by side in front of the UN in New York with a single aim of condemning the criminal regime of Khamenei-Ahmadinejad. And finally, the students at Tehran University protested the presence of Kamran Daneshjoo (the fraud Higher Education minister) who was filling for Ahmadinejad.

With such admirable array of Iranian people struggle for Democracy and Human Rights while the main concern of the US and other major European countries is Nuclear issue and when the Khamenei-Ahmadinejad regime is eager to seek international legitimacy by entering such negotiations, what would be the crucial human/social responsibility of Iranian such as us for helping our people so Democracy and Human Rights stay the front and center issue in dealing with this criminal regime.
