

UK Science & Technology and
the British Council present:

A Lecture Series

From Outer Space to Inner Mind: Aliens, Consciousness, and Psychocivilization

UK Scientists Probe the Mysteries of the Universe and the Human Psyche

Featuring:

Jack Cohen

Internationally-known reproductive biologist and consultant to top science fiction authors (e.g. McCaffrey, Pratchett, Gerrold) designing alien creatures and ecologies

What Does A Martian Look Like?

Feb. 8th, 6pm □

MIT Stata Center Rm. 32-123

Susan Blackmore

Freelance writer, lecturer and broadcaster, best known for her book *The Meme Machine*

Are You Sure You're Conscious Now?*

Mar. 1st, 6pm □

MIT Stata Center Rm. 32-123

Steven Rose

Neurologist and Professor of Biology at the Open University and author of new book *The Future of the Brain*

Can the Brain Explain the Mind?

Mar. 15th, 6pm □

MIT Green Bldg. Rm 54-100

*Learn How to Study or Research Science in the UK

After the lecture, join us for a panel discussion on science & technology graduate studies and study abroad opportunities in the UK. Experts from UK universities and former Marshall/Chevenering scholars will be on hand to answer all your questions about choosing the right school, applying, financing, living in the UK, and more. A reception open to everyone will follow.

Refreshments to follow each of the lectures.
