

Stanley P. Stone Distinguished Lecture Series

APPROACHING THE END OF THE WORLD: GEOLOGICAL AGE OR HISTORICAL EPOCH?

ROSALIND WILLIAMS

Bern Dibner Professor of the History of Science and
Technology at Massachusetts Institute of Technology

**OCTOBER 19 AT 4PM
LECTURE, Q&A**

Free and open to the public
871 Commonwealth Avenue
Jacob Sleeper Auditorium

In the last century, humankind has reached a decisive turning point as human needs, desires, works, and actions dominate the planet as never before. Williams advocates an interdisciplinary approach to understanding the origins and implications of the human-dominated world.
