

MIT History Faculty, Anthropology Program, & the Program in Science, Technology and Society present the

Democracy, Citizenship, and Technology Series

supporting the

2018-2019 Arthur Miller Lecture on Science and Ethics

ELECTIONS and TECHNOLOGY

DAN WALLACH, Panelist

Rice University

Research interests include mobile code, wireless and smartphone security, and the security of electronic voting systems. He has recently provided expert testimony on election security to the Texas Senate and U.S. Congress.

DANIEL KREISS, Panelist

University of North Carolina, Chapel Hill

His most recent book, *Prototype Politics: The Making and Unmaking of Technological Innovation in the Republican and Democratic Parties, 2000-2014*, explores the role of digital media, data, and analytics in contemporary campaigning.

MOON DUCHIN, Panelist

Tufts University

Her mathematical research is in geometric group theory, low-dimensional topology, and dynamics. In this work, she investigates the applications of geometry and computing US redistricting, as well as training experts to testify in gerrymandering cases.

ALEX REISS-SOROKIN, Moderator

MIT

As an MIT student in the HASTS Ph.D. Program, she is focusing on the social, political, and legal aspects of digital platforms, exploring the rules and policies developed by private entities and their regulatory effects.
