

# BUILDING EVACUATION PROCEDURAL ADJUSTMENTS

*During Coronavirus (COVID-19) Public Health Emergency*

Maintain a safe distance from others while evacuating the building. The Centers for Disease Control and Prevention (CDC) suggest **maintaining at least 6 feet distance**.

Do not take the elevator.

Direct yourselves to the designated assembly locations for your building (indoor or outdoor) - if the space is too crowded please move away and maintain at least 6 feet from the other residents.

Do not stand in front of the building entrance – firefighters require easy access to the building.

Do not stay in the building, if the weather is inclement take shelter in the buildings next door and maintain proper distance.

Once the Cambridge Fire Department (CFD) gives the all clear, return to your room always keeping 6' away from each other.

Avoid taking the elevator to maintain social distancing as you return to your room.
